Meso Stamp?

Meso Stamp is a procedure which stimulates the skin to produce new collagen formation, thereby reducing wrinkles and improving skin texture. Meso Stamp is composed of a micro needle and all components used are skin friendly with no known negative side-effects. It may bring the effectiveness to prevent aging your skin and to help cell revitalizing.

MICRONEEDLE Therapy

The Microneedle Meso Stamp is a unique device that significantly enhances the action of the Meso Therapy System. With the Meso Stamp's nearly 80 stainless steel micropoints painlessly driving Clinical Resolution's active Ampule, and Essence into the skin, providing for maximum effectiveness, while stimulating the skin's natural renewal process.

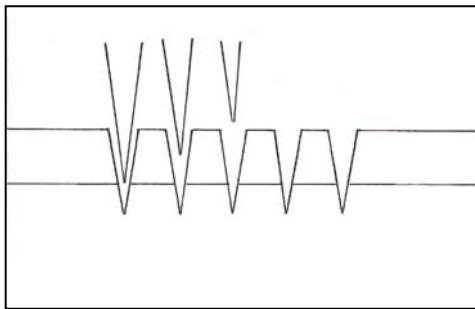

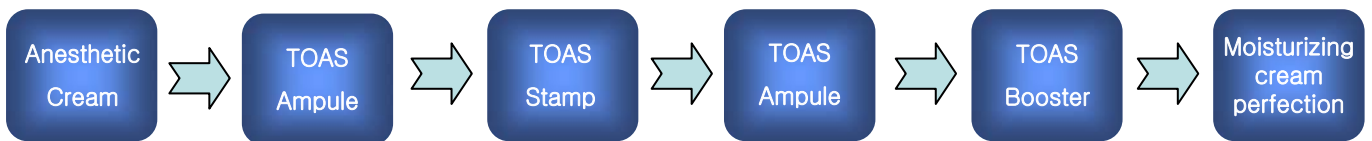

The principle of the Meso Stamp, equipped with 80 stainless steel needles with no Toxicity, is that when the "microneedles" is applied to the skin, it creates channels deep into the dermis of the skin, which is the main obstruction to penetration of active ingredients. Once this layer has been breached, the active ingredients in the skin care products can reach into the depths of the skin up to 4000% more effectively than by simply applying the products topically.

TOAS & Meso Stamp therapy Program

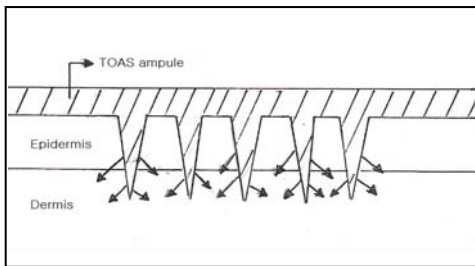

Combining your skin self-reproduction capability with natural reproduction hormone Anti-Aging System of TOAS is highly recommended and effective.
